BOERS DEFEATED NEAR KIMBERLEY SUCCESSFUL SORTIE OF THE BRITISH-

London, Oct. 27 .- A dispatch from Cape Town to-day gives details of the defeat of seven hundred Boers by the British at Riverton, north of Kimberley, Wednesday, in which the enemy was completely routed, with heavy loss, the British of locating the Boer force. loss being three men killed and twenty men, inpluding two officers, wounded. This is probably as referred to in the Cape Town dispatch of yesterday evening, in which it was said that official reports from Kimberley on Tuesday announced that Colonel Scott-Turner, with 270 keppe at Pont's Drift. en, had an engagement with the Boers, during of the Lancashires, who cleared, at the point of the bayonet, the hill occupied by the enemy The Roer losses are described as very heavy Colonel Scott-Turner's force consisted of the local volunteers, who, with the Lancashires, completed the rout of the burghers after Murray's artillery had driven them out of their entrenchments. Botha commanded the Boshof The fight lasted four hours.

The sharp struggle appears to have been the cordon surrounding the place. The Roers were entrenched strongly seven miles northward. It | killed at Mafeking. is said that the Boers twice unfairly used a white flag. Botha, who was among the killed, was a member of the Volksrand and a famous Dutch fighter. He distinguished himself as a marksman at Brenkhorst Spruit, when the British 94th Regiment was moved down. He afterward defended a farmhouse against the British. When he surrendered the farmhouse, Botha was found with five wounds, bathed in blood. Before the sortie Kimberley was apparently

in high spirits, as a dispatch from there, dated October 23, says every one was cheerful at that time, and that a wedding was celebrated there that day. The dispatch adds: Great enthusiasm has been aroused here by

the news of the British successes in Natal. Sev-rral farmers in the neighborhood of Kimberley have been noticed in the ranks of the Boers. A letter from Father Rorke said six hundred Boers, with one hundred wagons, were laagered at Taungs. All the whites have left, except the women, who sought refuge in the convent. The Boer commandant has promised to protect

The news from the northern border indicates that the Boers are actively trying to prevent Colonel Plumer from relieving Mafeking, Hence the absence of news since Pretoria announced the bombardment of the place is creating considerable alarm.

The newspapers are making the most of what they claim to be "significant admissions" in the supposed Boer official telegrams.

Cape Town, Oct. 26 (evening).—Official reports from Kimberley, dated Tuesday, state that Colonel Scott-Turner, with 270 men, proceeded northward to MacFarlane's Farm, where they unsaddled their horses. At 9 o'clock a party of Boers was seen on the right flank and was quickly scattered, Colonel Scott-Turner opening ray, but was met with a heavy fire from a dam wall 600 feet to the left.

At 11 o'clock Colonel Murray ordered 150 men of the Lancashire Regiment to proceed to the north. An armored train was supporting Colonel Scott-Turner, At midday Colonel Murray started also, with two field guns and two Maxims, and seventy mounted men. PLANS FOR THE SHAMROCK. SHE WILL GO STRAIGHT TO SEA FROM HER PRESENT MOORINGS.

Captain Hogarth, the skipper of the defeated Cup challenger Shamrock, said yesterday that his vessel would take on her steres where she lies at the Eric Basin, and would not go to Tompkinsville to do so. He said the vessel would go straight to sea from her present resting place, and unless the weather was bad there would be no anchoring at

The strengthening braces, knees and stringers which she carried on the outward passage have been repinced, and the yacht has had much internal strength added since she sailed for the Cup. It was thought when she left England that her construction was so light, considering the great weight she carried on her fin, that these strengtheners were necessary to enable her to withstand the wrenching of an ocean trip.

The yacht is now floating high, and a considerable amount of lead ballast, in small pieces, was removed from her when she first began the work of removine the cutter rig. It is supposed from this that the desire is to lighten the strains all round as much as possible. As she now floats she is away above the water line she called on in the preliminary tests off Sandy Hook.
